

Hemp Animal Bedding

Dust-free, Highly Absorbent, and Strong.

Hemp hurd is the woody interior core of the hemp plant. Its qualities make it a superior alternative to traditional horse bedding materials. Its weight makes for easy mucking, and its high absorption means can last longer compared to wood shavings or straw - saving you money and labor.

It is also dust and chemical free making it friendlier for horses with respiratory issues. Hurd is completely bio-degradable and breaks down quicker than straw or wood. As a result, hemp hurd makes high-quality compost.

Loose fill hemp hurd. Different grades and consistencies of hurd are available.

Call Natural Fibre Technologies today to inquire about using Hemp Animal Bedding in your stables and small animal cages

CURRENTLY AVAILABLE IN 14KG/30LBS POLY BAGS (32" x 18" x 14")
Please inquire about bulk shipments and/or wholesale pricing.

The Environmental Benefits of Hemp Bedding

Hemp is a fast-growing plant that can sequester large amounts of carbon. As a renewable material, hemp animal bedding is the most environmentally friendly animal bedding product available.
